I am a highly motivated and curious Web Developer with a background in electrical engineering. With my strong communication skills can I easily adapt to new environments and my high resilience fosters strong problem solving skills. I enjoy working in a forward thinking team and prioritize team success over personal achievements.

Skills

- HTML, CSS, Tailwind, JavaScript Frameworks (Vue.js, React, Next.js), TypeScript, Testing (Jest, Cypress), Three.js
- Node.js, Express, Firebase, MongoDB, REST API, GraphQL, Git Version Control, SEO, Responsive Web Design
- German (Native), English (Fluent), Swedish (Beginner)

Experience

Web Developer

freelance

08/2023 - current

- **Open Source Contribution:** Developed and published the npm package og-preview which generates a preview of all available open graph meta data for websites running on a local development server.
- **Developed Learning Application:** Created a flashcard web application that tracks and visualizes the learning progress, integrating Firebase to enhance data handling and user experience.
- **Developed Local Business Website:** Built a responsive website for a local car dealer, optimizing the user interface to improve customer interaction and sales conversion.

Team leader

Eurogate - Germany

01/2019 - 09/2021

- **Managed Project Teams:** Oversaw 25 employees across multiple projects and effectively coordinated subcontractors to ensure projects are completed successfully and in time.
- **Optimized Crane Upgrades:** Achieved a 25% cost reduction in upgrading container cranes with LED lights through replanning and optimizing workflows.

Technician

Eurogate - Germany

08/2012 - 12/2018

- **Upgraded Machine Software:** Enhanced machine software (PLC) to support specialized repairs and system upgrades while ensuring compliance with security requirements.
